## OWASP MEMBERSHIPS

global strategic group

Software powers the world, but insecure software threatens safety, trust, and economic growth. The Open Web Application Security Project (OWASP) is dedicated to making application security visible by empowering individuals and organizations to make informed decisions about true application security risks.

OWASP boasts 46,000+ participants, more than 65 organizational supporters, and even more academic supporters.

As a 501(c)(3) not-for-profit worldwide charitable organization, OWASP does not endorse or recommend commercial products or services. Instead, we allow our community to remain vendor neutral with the collective wisdom of the best individual minds in application security worldwide. This simple rule is the key to our success since 2001.

Your individual and corporate membership powers the organization and helps us [serve the mission](#). Please consider becoming an OWASP member today!

The screenshot shows the homepage of the AppSec Europe 2017 website. At the top, there's a navigation bar with links for Register, Sponsors, Submit, Belfast, and About. To the left of the main content area, there's a sidebar featuring the OWASP logo and the text "OWASP AppSec EU Belfast May 2017". The main content area features a large image of the Belfast Waterfront Conference Center. Overlaid on the image are the text "Waterfront Conference Center" and "From 8<sup>th</sup> to 12<sup>th</sup> of May". Below the image, there are three sections: "TRAININGS AND CONFERENCE", "VENUE", and "KEY CONFERENCE".

HISTORY

RULES

## University Students

Spend your summer break writing code and learning about open source development while earning a stipend! Accepted students work with a mentor and become a part of the open source community. Many become lifetime open source developers!

Google Summer of Code is open to post-secondary students, age 18 and older in most countries.

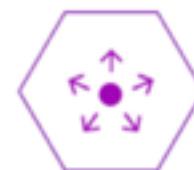

**Student Applications open on March 20th, 2017.**

## How It Works

### Apply

Interested students propose a project to work on.

### Code

Accepted students spend the summer coding with guidance from a mentor.

### Share

Submit your code for the world to see!

- Become a **Mentor for a student**:
- Choose a **participating OWASP project** from the wiki page, preferably the one you are **most familiar** with.
- Touch base with the project leader and ask one of the OWASP Administrators to send you an invitation to get started today.
- Help OWASP Invite Students:
- Are you somehow affiliated with a university? Get in touch with students, inform them about the program and how they can participate with OWASP.  
Please direct students to the wiki page for details: [https://www.owasp.org/index.php/GSOC\\_2017\\_for\\_Students](https://www.owasp.org/index.php/GSOC_2017_for_Students)

## GSOC 2017 for Students

OWASP is applying to be a Google Summer of Code ("GSoC") mentoring organization in 2017!

**STUDENTS: THE PROPOSAL SUBMISSION PERIOD WILL BE OPEN UNTIL April 3rd**

[Google Summer of Code Program Site](#)

OWASP is an open community dedicated to enabling organizations to conceive, develop, acquire, operate, and maintain applications that can be trusted.

All students currently enrolled in an accredited institution are welcome to participate in the Google Summer of Code 2017 program, hopefully along with the OWASP Foundation.

Below you could find all the instructions on how to participate.

[hide]

- 1 What is GSOC?
- 2 Instructions common to all participants
  - 2.1 Programming Language
- 3 Instructions for students
  - 3.1 General instructions
  - 3.2 Getting in touch
  - 3.3 Recommended steps
  - 3.4 Student proposal guidelines
  - 3.5 Hints
- 4 Instructions for mentors
  - 4.1 Ideas

Road Map and Getting Involved

Project About

[edit]

### OWASP DefectDojo Tool Project [\[edit\]](#)

An open source vulnerability management tool that streamlines the testing process by offering templating, report generation, metrics, and baseline self-service tools.

DefectDojo is a tracking tool written in Python / Django. DefectDojo was created in 2013 and open-sourced on March 13th, 2015. The project was started to make optimizing vulnerability tracking less painful. The top goal of DefectDojo is to reduce the amount of time security professionals spend logging vulnerabilities. DefectDojo accomplishes this by offering a templating system for vulnerabilities, imports for common vulnerability scanners, report generation, and metrics.

- OWASP DefectDojo is a security program and vulnerability management tool.
- DefectDojo allows you to manage your application security program, maintain product and application information, schedule scans, triage vulnerabilities and push findings into defect trackers

## Owasp-DevSecCon-Summit

### Owasp-DevSecCon Summit, England, April 2017

OWASP is joining forces with DevSecCon to create a Summit focused on the collaboration between Developers and Application Security.

This is not a conference with uni-directional presentations, this is a working summit with working sessions on areas like:

- Secure Coding,
- Security Testing/TDD
- DevOps,
- Threat Modeling
- Mobile Security
- IoT
- Risk & Governance
- Privacy & CTO/CISO requirements
- Secure Design
- Bug-bounties
- Browser Security
- AI for Attack & Defence
- DDoS
- Cyber Warfare
- AppSec Standards;

... and of course, working sessions on popular OWASP projects (lead by its leaders) such as:

Talk time
